

Bed Bug Preparation

1. Remove all clothing, boxes, shoes, and debris from floors.
2. Move furniture at least 3 feet away from walls.
3. Vacuum all areas.
4. Wash or dry-clean all clothing, towels, linens and bedding.
Place cleaned item in plastic bags and tie securely. **Note:** DO NOT place bags back into areas to be treated.
5. Every job is unique – the technician servicing will give further instructions after the initial treatment, which will be based on activity level and amount of personal items in the household.
6. If discarding any infected beds, furniture or electronics, **PLEASE damage or destroy after first treatment.** Do not move items throughout the home prior to treatments. This will only cause the bed bugs to spread to other areas.
7. Must vacate household for **4 hours** after treatment has been completed.
